

"The issues this study reveals will be of interest to the Internet industry, to government officials and analysts debating the future of the Internet, and to businesses and individual users who rely on Internet stability."

Internet Analysis Report 2004

Protocols and Governance

The Internet Analysis Report - 2004 is an objective, in-depth analysis of internet protocol and governance issues, including:

- Major issues confronting users and what can be done about them
- Emerging issues with core protocols and how they will affect the Internet in coming years
- A comprehensive neutral analysis of existing governance bodies such as IETF and ICANN
- An overview of change management options involved in addressing these issues
- Conclusions and recommendations.

The 116 page report cuts through the clutter to provide a detailed overview of the current state of the Internet and key organisations.

Written by Internet expert [Ian Peter](#), the report provides a plain-English evaluation of the current Internet in order to highlight the issues that need to be addressed in creating tomorrow's Internet.

What readers are saying...

"excellent work - a good and informative paper"

"very clear and insightful"

"lays out its case in simple, understandable terms"

"what I found valuable about it was the breadth of the approach, introducing readers to a wide range of barriers that the Internet faces in increasing the breadth and depth of its current coverage"

Internet Analysis Report 2004 - Protocols and Governance

Inside the full report you will find...

- an analysis of ageing Internet protocols and systems, and whether they will scale to the future
- an analysis of user issues including spam proliferation, viruses and worms, fraudulent activity, and multilingual domain names, and options for addressing them
- an analysis of the history and structure of Internet governance bodies
- case studies which reveal structural problems in dealing with major issues
- professional analysis of change factors, risks, and dependencies in addressing these problems
